M + A MATTING

M+A Matting • Satisfaction Guaranteed

M+A mats are where design and function come together, where quality isn't compromised to meet a price point, and where solutions to your maintenance and décor problems come first. We promise our customers an unconditional, 100% satisfaction guarantee for the life of the product.

At M+A, we are committed to reducing our environmental impact. We are continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods. We have reduced waste going to landfills by 80% and recycle most paper, metal, cardboard, plastic, carpet, and rubber waste we generate. Our commitment is also evident in our development of dozens of mat styles that contain recycled raw materials.

For over five decades, M+A Matting has been America's leader in innovative floor protection systems, industrial safety, anti-fatigue products, and high performance entrance matting. If you are looking for better ways to minimize maintenance, prolong floor surface life, reduce cleaning costs, improve safety, or increase worker comfort, ask for M+A Matting.

*The 100% nitrile rubber surface is grease/oil proof; the nitrile-blended cushion is grease/oil resistant

The Benefits of Anti-Fatigue Mats

Anti-Fatigue mats alleviate stress to the back and legs by providing a cushioned surface to stand on.

Anti-Fatigue mats are perfect for people who have to stand or work in the same place for continual periods of time.

Anti-Fatigue mats are recommended for a wide variety of industries and are commonly placed in various applications such as:

- Production or assembly lines
- Stand Up Desks or Workstations
- Kitchens
- Cashier Desks
- Laboratories and many more

M+A Matting Anti-Fatigue mats have been shown to do the following:

- **REDUCE ENERGY CONSUMPTION BY UP TO 50%** in the supporting muscles such as those in the leg and the lower back, when compared to standing on a hard floor
- **REDUCE FATIGUE** by promoting subtle movement in the leg and calf muscles, resulting in increased blood and oxygen flow

BALANCED

- Improves structural alignment and joint function
- Improves muscular balance and prevents nerve impingement
- Reduces uneven wear and tear on joints
- Body weight evenly distributed
- Efficient natural movement
- Reduced pressure on organs

IMBALANCED

- Neck pain and headaches
- Shoulder restrictions and pain
- Arm and hand pain nerve entrapment
- Bulging discs/back pain
- Uneven pressure/knee pain
- Uneven weight distribution
- Foot and ankle pain

Safety and Ergonomics

Mats are used throughout facilities in numerous other capacities where safety is a must and anti-fatigue comfort is essential to the health and well being of employees.

- Slip and falls are the second leading cause of all workplace injuries according to Liberty Mutual Workplace Index. As many as 25,000 people a day are victims of slip-and-fall accidents (NSC).
- Compensation and medical costs associated with employee slip-and-fall accidents total approximately \$70 Billion annually (NSC).
- The average cost of a slip-and-fall injury exceeds \$12,000 (Wausau Insurance).
- The average cost to defend a slip-and-fall lawsuit is \$50,000 (NFSI).
- Back injuries account for 25% of all worker compensation claims annually
- Cumulative Standing Trauma (CST) causes billions of dollars of loss annually due to reduced productivity, increased worker compensation, higher insurance rates, and absenteeism.
- According to the American College of Occupational and Environmental Science, about 38% of workers in the United States suffer from fatigue.

Testing shows that ergonomic matting can reduce worker fatigue.

Compression Deflection & Durometer (Hardness) Comparison

Compression Deflection

General Principal

1. This test was designed to assess and compare performance characteristics of a variety of industrial anti-fatigue mats submitted for testing. Two specific load levels were applied to the test samples and the results show the deflection measured. The two specific load levels performed were 20 psi, equal to a 150 pound human and 40 psi, equal to a 600 pound human.
2. Readings suggest that less than 20% deflection could be perceived as too hard and readings above 60% deflection could be perceived as too soft. It appears that between 20% and 60% deflection anti-fatigue properties can be felt.

Durometer/Hardness

General Principal

The hardness of a test sample is measured by means of a Type A Shore Durometer. The Durometer measures the penetration of its specified indenter forced into the test material under specified conditions. The lower readings indicate softer materials.

TEST RESULTS

 M+A MATTING	COMPETITOR'S
Comfort Flow™ & Cushion Station™ Comfort Flow: 28% deflection @20psi 46% deflection @40psi Cushion Station: 36% deflection @20psi 49% deflection @40psi Durometer/Hardness: Comfort Flow: 45 Cushion Station: 50-55	Traditional Industrial Red Mat 11% deflection @20psi 22% deflection @40psi Durometer/Hardness: 70
Cushion Max 49% deflection @20psi 65% deflection @40psi	PVC Foam 38% deflection @20psi 59% deflection @40psi
Hog Heaven® 5/8" 40% deflection @20psi 55% deflection @40psi Durometer/Hardness: 56	Diamond Plate 5/8" 48% deflection @20psi 65% deflection @40psi Durometer/Hardness: 85

ESD Matting

ESD Matting is designed to quickly drain static electricity from people to help protect sensitive equipment from damage.

ESD Matting is divided into three classifications:

- 1. Electrically Conductive** is rated 10^1 to 10^5 and accepts static electricity the quickest. This is the most often used ESD matting.
- 2. Static Dissipative** is rated 10^6 to 10^9 and is the middle range of ESD matting.
- 3. Anti-Static** is rated 10^{10} to 10^{12} and accepts static the slowest.

ESD Matting is rated in ohms, or the measure of resistance. The lower the resistance, the more quickly static is accepted by the matting, i.e., the lower the exponential, the more quickly static is accepted.

Accessories

Ground Cords are used to allow static electricity to pass more efficiently to a ground and provide a controlled path. Use the cord to connect all ESD floor mats to a building ground. The terminal can be connected to an electrical outlet using the screw in the outlet cover.

Heel Grounders are made for workers wearing rubber soles and other insulating shoes. They allow static electricity to pass around the shoe into the ESD matting. Fasten the Heel Grounder to the heel of the shoe with the Velcro and allow the fabric strip to touch the sock or skin for best performance.

Mat Symbols

Anti-Fatigue

Ergonomic mats and floor tiles reduce fatigue by up to 50%. Anti-fatigue mats help increase blood circulation and reduce pressure on the body's musculoskeletal system. They also reduce foot arch pronation, varicose veins, and pain commonly attributed to standing for long periods of time.

Safety

Matting and tiles with highly visible, colored borders and beveled edges reduce trips and falls.

Chemical Resistant

Many M+A Matting mats are manufactured with nitrile rubber which is resistant to most commonly used chemicals. Please consult the chemical compatibility chart on page 5 for additional information.

Oily Environment

Nitrile rubber mats withstand degradation from oils and grease. These mats are suitable for use in environments with industrial oils, machine lubricants, greases, food grade oils, etc.

Wet Areas

Matting suitable for wet environments; products with this icon have a bi-level surface and water dam designed to hold moisture and keep floors dry, or they have openings designed to let water pass through the mat and keep the work surface dry, or are otherwise designed to be slip-resistant in wet environments.

Dry Areas

80% of applications are for dry environments and are designed to hold up under heavy foot traffic. Matting and tiles are available in a wide range of sizes, materials and colors.

ESD

Matting that dissipates static electricity from people to protect sensitive equipment and small static generated electric shocks.

Welding Safe

Matting that is suitable for use in locations of high temperatures and welding slag. The temperature resistant rubber can withstand temperatures up to 1742 degrees Fahrenheit from welding slag and hot metal shavings.

Mat Symbols

Anti-Slip

Uniquely designed texturized surfaces prevent slip and fall accidents. Heavy-duty rubber keeps the mats in place and prevents movement on a variety of surfaces.

Non-Conductive

Matting created for Switchboards and high voltage areas. Prevents workers from being grounded and reduces the potential for injuries caused by electrical shock.

Cart Traffic

Matting and tiles designed to withstand heavy cart traffic, and is also an ideal placement around heavy objects.

Anti-Microbial

Matting permanently treated with an anti-microbial agent that guards against degradation from micro-organisms and minimizes mats being a source of odors.

Interlocking Floor Tiles / Mats

Tiles that can be customized to fit large work areas and various shapes around work tables, machinery, conveyors, etc. Interlocking tiles may be easily reconfigured as equipment is moved.

Scraper

Scraper mats are heavy-duty mats designed to stop mud and larger particles of dirt from being tracked inside buildings.

Scraper/Wiper

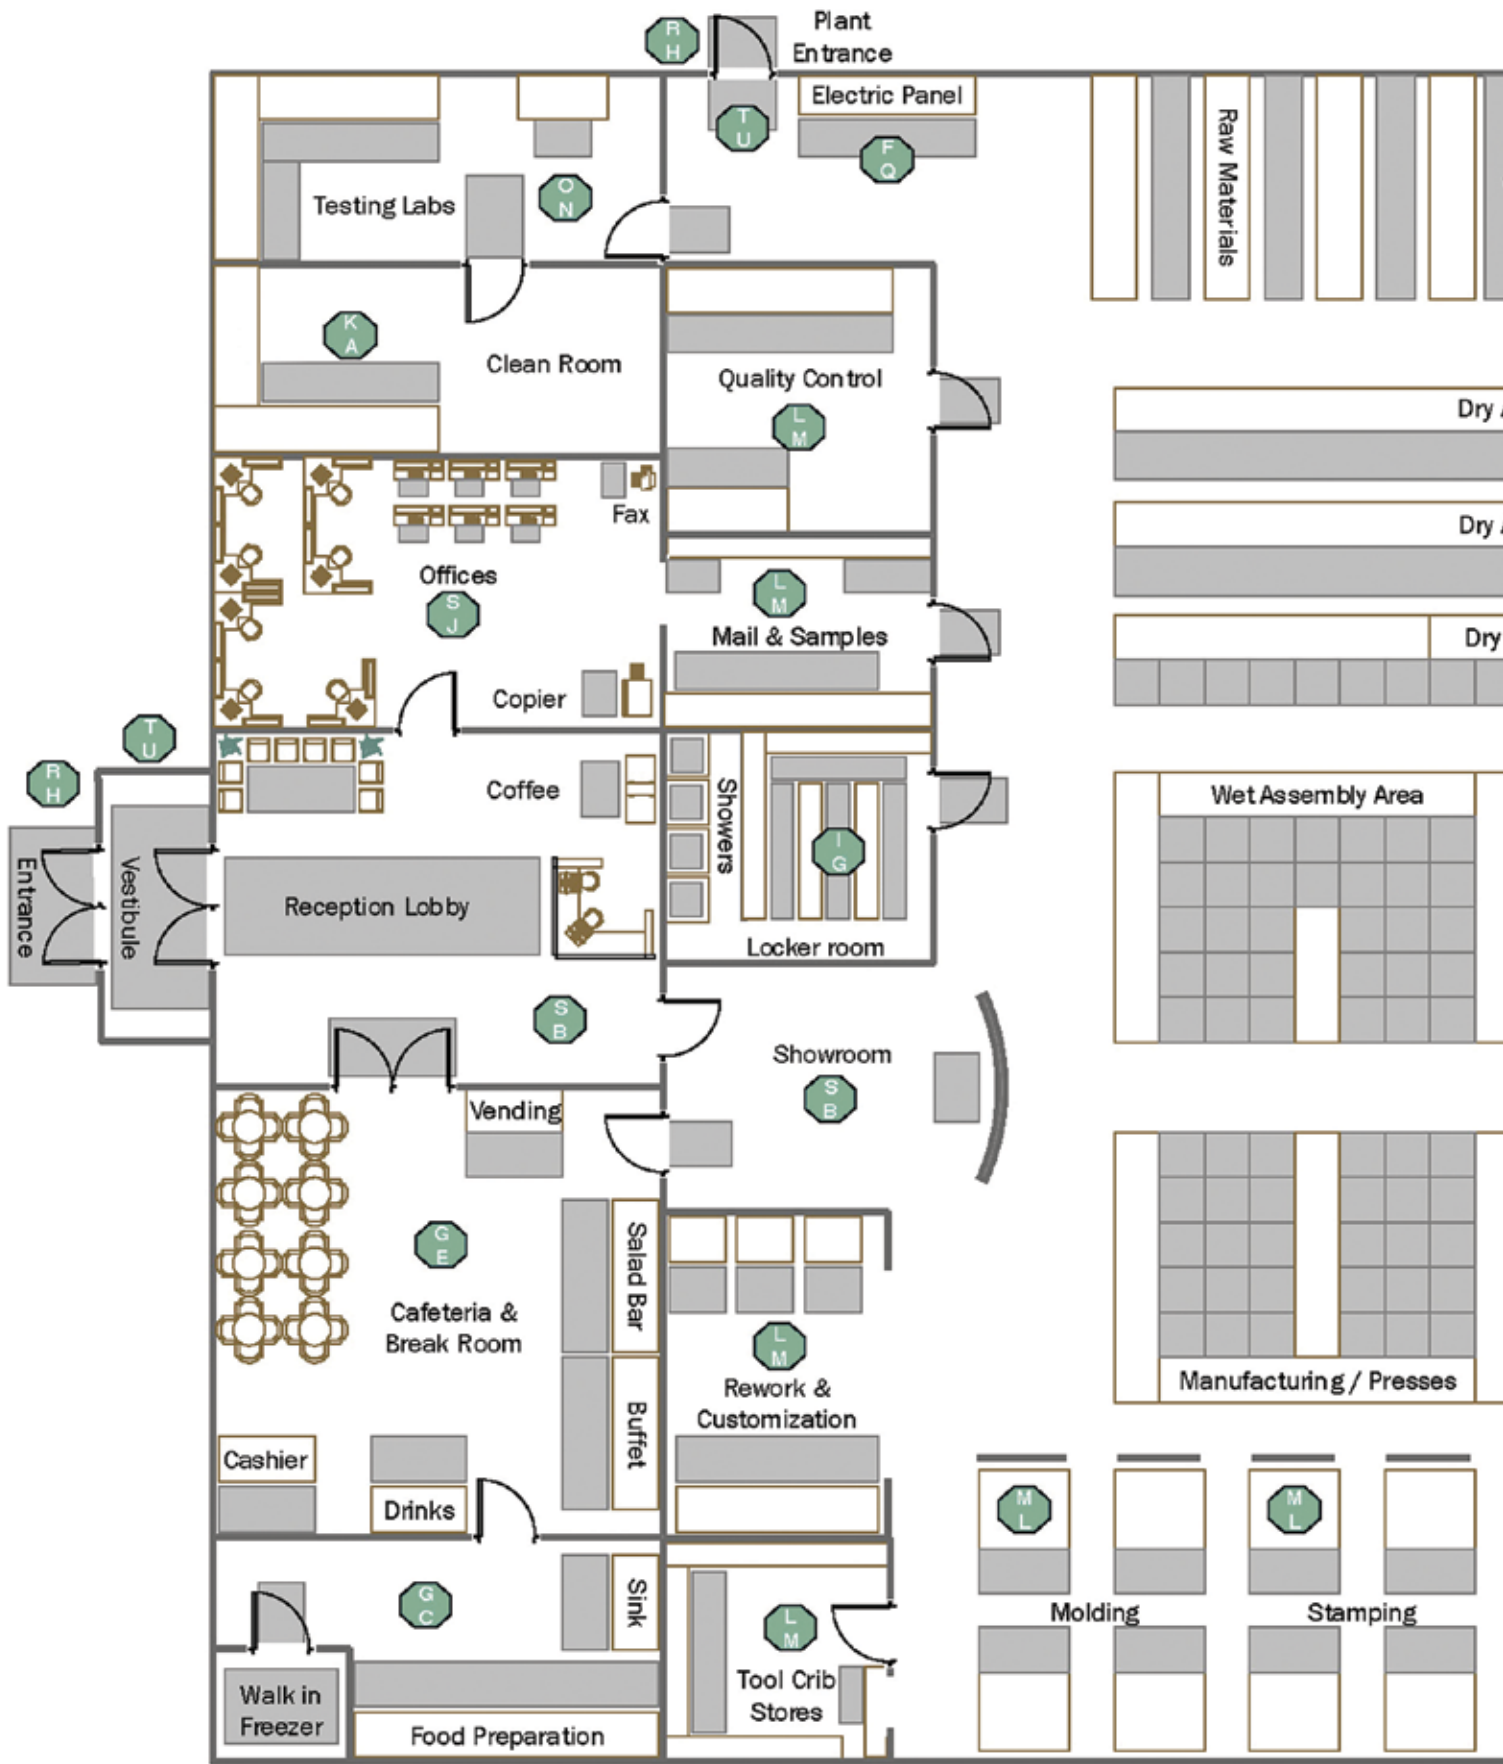

Scraper/Wiper mats provide scraping action and wiping to further stop dirt and moisture from entering a facility. These mats are typically made of tough heavy-duty commercial fabrics. They retain dust in recessed grooves while absorbing moisture in the fabric surface.

Wiper

Wiper mats are designed to stop any remaining dust and moisture. These mats are made with a variety of carpeted surfaces and colors to compliment a wide range of interiors.

Mat Selector Guide

Are you getting the most from your anti-fatigue mats?

Hog Heaven®

vs.

Traditional Diamond Plate

Durable nitrile rubber surface; nitrile-blended foam cushion	PVC Surface; PVC foam cushion
Slip-resistant, even when wet (0.86 wet per ASTM C1028-96)	Slippery when wet (0.17 wet per ASTM C1028-96)
Welding Safe	Not recommended for welding
Oil/grease proof surface; oil/grease resistant cushion	Not recommended for use around oil/chemicals
Electrically conductive	No anti-static benefits
Rubber borders will not ripple or curl	PVC borders will ripple & curl over time
Cushion is permanently molded to surface	Cushion is glued to surface and can delaminate
100% customer satisfaction guarantee	3-year guarantee

Anti-Fatigue Mats

Provide Comfort and Increase Productivity

Anti-Fatigue mats are available in a wide range of sizes, weights and materials. It has been proven that the proper use of anti-fatigue mats can enhance worker productivity. These mats are designed for use wherever workers spend time standing and will help to eliminate muscular skeletal disorders.

Slip Resistant and Safety Mats

Protect Against Slips and Falls

Slip resistant and safety mats help provide safe working areas for employees and visitors to facilities. 85% of worker's compensation claims are attributed to employees slipping on slick floors. The utilization of slip resistant mats is an ideal solution to prevent such accidents from occurring.

Flow Through Mats

Wet Area Solution

Flow through mats allow liquids to pass through them to eliminate slip hazards. Anti-fatigue properties provide comfort when standing for long periods of time. The thick rubber helps alleviate stress on the legs, feet and lower back.

Runner and Floor Protection Matting

Runner matting made with nitrile rubber covers inside walkways and helps reduce slips and falls. Slips and falls are a leading cause of accidents in the workplace and providing sure footing is important to help decrease these types of accidents. Runner matting also protects the floor from parts or other objects being dropped, as well as aids in noise abatement.

Switchboard Matting

Switchboard matting protects workers from dangerous and harmful deadly shocks that can occur with electrical switchboards. This matting keeps the workers from being grounded and insulates them against high voltage. Switchboard matting is commonly referred to as non-conductive matting.

- **Comfortable** – High-density nitrile-blended cushion helps eliminate pressure to the lower back and legs, providing superior comfort
- **Safe** - Certified high-traction by the National Floor Safety Institute (NFSI); edges will not crack or curl and provide a safe transition from floor to mat
- **Durable** – Nitrile-blended cushion provides years of useful service life; cushion is molded, not glued, to the nitrile rubber surface so it will not separate
- **Versatile** - Welding safe; grease/oil proof surface (resistant cushion); chemical resistant; ESD rating of electrically conductive
- Available in 5/8" or 7/8" thicknesses with solid black or with OSHA-approved caution yellow borders
- Can be customized with your logo, design, or message (see Hog Heaven Impressions)

(enlarged view)

- **Comfortable** – 1/2" dense foam cushion encapsulated in nitrile rubber provides excellent anti-fatigue qualities

- **Safe** – Certified high-traction by the National Floor Safety Institute (NFSI); low profile beveled edges provide a safe floor-to-mat transition

- **Durable** – Borders will not crack or curl; nitrile rubber surface is penetration proof

- **Versatile** – Welding safe; grease/oil proof; chemical resistant; ESD rating of electrically conductive

- Available in two surface types: textured surface for dry/damp environments or grip surface for wet areas where additional traction is needed; Happy Feet with textured surface can be autoclave sterilized

- Available in solid black or with OSHA-approved caution yellow borders

- Linkable mats are available for larger areas

HOG HEAVEN PRIME®

Anti-Fatigue • Slip-Resistant

3/4" Black
3/4" Caution Yellow

Product No. 4220
Product No. 4221

- **Comfortable** – High-density nitrile-blended cushion runs edge to edge and helps eliminate pressure to the lower back and legs, providing superior comfort
- **Safe** – Certified high-traction by the National Floor Safety Institute (NFSI); beveled edges will not crack or curl and provide a safe transition from floor to mat
- **Durable** – Nitrile-blended cushion provides years of useful service life; cushion is molded, not glued, to the nitrile rubber surface so it will not separate; anti-microbially treated to provide lifetime protection from odors and degradation
- **Versatile** – High-heel safe; grease/oil proof surface (resistant cushion); chemical resistant; welding safe; ESD rating of electrically conductive
- Available in solid black or with OSHA-approved caution yellow borders

Site Audit/Assessment

STEP 1

STEP 2

[illegible]

Email assessment to
quotes5@mamatting.com
for the proof

[illegible]

STEP 3

A Site Audit by an M+A Matting Expert Includes:

- A complete assessment of your facility
- Review of the findings with you
- Development of a plan based on your budget and timeline
- Delivery of a report based on the information above

Benefits to Employees:

1. Reduced fatigue and improved skeletal structure alignment
2. Increased productivity
3. Improved morale
4. Reduced slips, trips, and falls

The M+A Matting Logo Mat Program

M+A Matting offers numerous types of logo mats.

Each of these logo mat processes result in high quality products your customers will be very proud to use. Pricing is calculated by each individual design number and quantity. Different size logo mats and standard mats may not be combined for quantity discount.

Ordering Logo Mats is as easy as 1-2-3:

- 1) Visit www.mamattening.com to submit your logo file using our easy to use web page.
- 2) Log into your account and select “Submit Design” from the “My Account” menu.
- 3) Complete the necessary information on the submit page, attach your logo file and then click on “Send your design”. Artwork should be 300 dpi or greater.

Your proof will be emailed back to you within 24 hours. Once your proof arrives by email, please take the following simple steps:

- 1) Approve or make necessary changes to the proof.
- 2) Return the art proof with any changes or approved art proof with purchase order and quantity of mats to artwork5@mamattening.com.

Acceptable	Unacceptable	Marginal

*Color prints, if available, may be submitted to show color placement for a design.

Create your own proofs with The M+A Matting Mobile App!

Visit your app store and search “M+A Matting” to download app.

The M+A Matting Mobile App provides an easy way for users to search and view existing mat designs as well as create their own proofs using our simple tools.

Each user will be able to:

- Create proofs using the mobile device camera or by loading an image from their library
- Have access to a personal dashboard that saves all current and former artwork submissions associated with their account
- Get instant artwork approval using e-signature feature
- Track orders of designs that were created via the mobile app
- Filter search results by product category, size or mat orientation

M+A Matting’s user friendly app is compatible with any mobile device.

Below is a condensed list of compatible devices:

- Android
- Android tablets
- iPhone*
- iPad*
- iPod Touch*

*all Apple products require iOS 6.0 or later

Scraper Entrance Mats

Your First Line of Defense

Scraper mats are designed to stop mud and larger particles of dirt from being tracked inside buildings. These mats provide aggressive scraping action and trap dirt and debris in recessed areas until the mats are cleaned. Scraper mats can be used outside or inside and should be used in conjunction with a Scraper/Wiper mat and a Wiper mat.

Scraper/Wiper Entrance Mats

The Second Step to Keeping Dirt Outside

Scraper/Wiper mats are designed to provide scraping action and wiping to further stop dirt and moisture from entering a facility. These mats are typically made of tough fabrics. They channel and retain dust in recessed grooves while absorbing moisture in the fabric face. These mats are primarily used inside but may be used outside in covered areas.

Wiper Entrance Mats

The Third Weapon Against Dirt and Moisture

Wiper Entrance Mats are designed to stop any remaining dust and moisture left after using the Scraper mat and Scraper/Wiper mat. These mats are made with carpet facing to complement most interiors. These mats are for indoor use and when used in conjunction with a Scraper mat and Scraper/Wiper mat, they can stop as much as 85% to 95% of dirt and grime from being tracked into a building.

Preventative Maintenance

Mats are the first defense to stop dirt and moisture from entering your building.

Mats filter these contaminants from entering the facility, saving thousands of dollars a year in cleaning costs. Mats also protect interior floor surfaces from excessive damage and wear. Entrance mats are the most effective way of stopping dirt and moisture at the door and keeping building maintenance costs to a minimum.

Consider These Facts...

- 70% to 80% of dust, grime and dirt in a building is tracked in from the outside on people's feet—permanently damaging floors
- One square yard of carpet can accumulate one pound of dirt a week—twice that in inclement weather
- It is estimated that the cost to find and remove a single pound of dirt from a building can run in excess of \$600 in cleaning costs. As few as 150 people entering a facility can track in one pound of dirt in a 5 day work week costing over \$30,000 dollars annually to remove.
- By utilizing high performance entrance matting of at least 10' to 15' (as recommend by the U.S. Green Building Council and the Carpet and Rug Institute) you can capture as much as 85% to 95% of contaminants that enter the building, saving maintenance dollars and protecting building assets

WaterHog® Backing Types

SBR Rubber
.078 mil thickness
Universal Cleated Backing
Recommended for carpeted floors.

SBR Rubber
.078 mil thickness
Smooth Backing
Recommended for hard floor surfaces
(with light to medium traffic).

Nitrile Rubber
.100 mil thickness
Anchor Safe® Backing
Recommended for hard floor surfaces with
heavy traffic and where carts are in use.
Available with classic rubber border only.

Slip and Fall Facts

THE PROBLEM:

- Slip and falls are the second leading cause of all workplace injuries (Liberty Mutual Workplace Safety Index; 2007)
- Approximately 25,000 people a day are victims of slip and fall accidents (NSC)

THE COST:

- Compensation and medical costs associated with employee slip and fall accidents total approximately \$70 billion annually (NSC)
- The average cost of a slip and fall related injury exceeds \$12,000 (Wausau Insurance)

THE HUMAN FACTOR:

- 65% of all lost work days are due to slip and fall accidents
- 22% of slip and fall accidents resulted in more than 31 days away from work (Bureau of Labor Statistics)

THE RISK:

- The average cost to defend a slip and fall lawsuit is \$50,000 (NFSI)
- 57% of all food service general liability claims are slip and fall accidents (C.N.A. Insurance)
- Since 1980, personal injury lawsuits have risen by more than 300% in the food service industry (National Floor Safety Institute)
- Plaintiffs win 51% of premises liability claims (JVR)
